Independent TRC20 Settlement Asset
tetherasset.com · Edition 2026

01 · INTRODUCTION

Introduction

TetherAsset (**USDT ■**) is an independent TRC20 settlement asset deployed on the TRON network. It is engineered for fast, low-cost on-chain settlement and transparent ecosystem participation across public DeFi infrastructure.

This litepaper outlines the project's vision, technical foundation, ecosystem references, and verification surfaces. It is intended for developers, market participants, and partners evaluating TRC20-native settlement primitives.

02 · VISION

Vision

Our vision is a permissionless, verifiable settlement asset that operates as open infrastructure — auditable on-chain, indexed by every major analytics provider, and accessible to any TRC20-compatible wallet without intermediaries.

TetherAsset is built around three principles: **transparency**, **accessibility**, and **composability** within the broader TRON ecosystem.

03 · TRON INFRASTRUCTURE

TRON Infrastructure

TRON is one of the largest public blockchains for stablecoin and value-transfer activity, offering sub-second finality, deterministic fees, and a mature validator set.

- High-throughput consensus with sub-second block finality
- Predictable, low-cost transaction economics
- Deep wallet, exchange, and analytics integration
- Mature TRC20 token standard with broad tooling support

04 · TRC20 ARCHITECTURE

TRC20 Architecture

TetherAsset is implemented as a standard **TRC20** contract — fully compatible with TRON-native wallets, bridges, DEXs, and analytics indexers. The contract is publicly deployed and observable on-chain.

- Standard: TRC20
- Network: TRON Mainnet

- Contract: [TL5ZiLhLBdFczRaeWH7ojikejWk3wjCc7o](#)
- Verifiable on TronScan and all TRON block explorers

05 · ECOSYSTEM

Ecosystem

TetherAsset participates in the open TRON ecosystem and is referenced across the leading public market and analytics venues. Indexing across multiple providers enables independent verification of price, liquidity, and trading activity.

- TronScan — contract & on-chain transparency
- DexScreener — live price and liquidity charts
- DEXTools — pair explorer and market analytics
- GeckoTerminal — pool-level liquidity metrics
- CoinMarketCap DEX — indexed market reference
- SunPump — TRON-native discovery

06 · VERIFICATION

Verification

Every aspect of TetherAsset is independently verifiable. The contract is open and indexed; market activity is observable in real time across third-party analytics providers.

- Public TRC20 contract on TRON Mainnet
- Cross-referenced across DexScreener, DEXTools, GeckoTerminal
- Transparent liquidity and pair data
- Open documentation at tetherasset.com/docs/

07 · LIQUIDITY INFRASTRUCTURE

Liquidity Infrastructure

Liquidity is provisioned through TRON-native AMMs and observable through public pool analytics. Pair address: [TDPp73HbmmaLWjtwMTT9CoA2cjDTnCKohd](#).

- On-chain TRC20 liquidity pool
- Real-time depth and volume tracking
- Permissionless swap routing across TRON DEXs
- Mobile-wallet compatible (TronLink, Trust Wallet, OKX, imToken)

08 · DOCUMENTATION

Documentation & Resources

The complete TetherAsset documentation is published openly and continuously updated.

- Docs: <https://tetherasset.com/docs/>
- Website: <https://tetherasset.com>
- Litepaper: <https://tetherasset.com/litepaper>
- Verification hub: <https://tetherasset.com/verification>

09 · MARKET INTEGRATIONS

Market Integrations

TetherAsset is indexed across the major public market data providers, enabling traders and integrators to access standardized price, liquidity, and pair information.

- TronScan — tronscan.org
- DexScreener — dexscreener.com/tron
- DEXTools — dextools.io/app/tron
- GeckoTerminal — geckoterminal.com/tron
- CoinMarketCap DEX — coinmarketcap.com/dexscan/tron

10 · ROADMAP

Roadmap

Phase	Milestone	Status
Phase 1	TRC20 contract deployment & TronScan verification	Complete
Phase 2	Liquidity bootstrapping & DEX listings	Complete
Phase 3	Cross-aggregator indexing (CMC DEX, Gecko)	Live
Phase 4	Ecosystem partnerships & wallet integrations	In progress
Phase 5	Expanded settlement tooling & developer SDK	Upcoming

11 · DISCLAIMER

Disclaimer

TetherAsset is an independent digital asset project and is **not affiliated with Tether Limited** or the official USDT token. Nothing in this document constitutes financial, investment, legal, or tax advice. Digital assets carry significant risk, including total loss. Readers should perform their own research and consult qualified professionals before participating in any market activity.
